

# Chaehee Park

Researcher at The Seoul Institute

[chaehee@si.re.kr](mailto:chaehee@si.re.kr)

## Research Interest

---

- **LLM and Applied AI Engineering:** Passionate about designing, optimizing, and researching LLMs to develop user-centered practical solutions leveraging cutting-edge AI advancements.
- **AI Serving and Back-end Systems:** Focused on building scalable and efficient back-end systems for deploying AI models, with expertise in API-based real-time serving and large-scale data processing infrastructure.
- **AI for Social Good:** Dedicated to applying AI technologies to address social challenges in fields like psychology, education, and sustainability, contributing to impactful and meaningful solutions for a better future.

## Education

---

Mar. 2023      **M.S., Applied Artificial Intelligence**  
- Feb. 2025      Sungkyunkwan University, Seoul (GPA: 4.25 / 4.5)  
                    *Advisor: Prof. Jin-Young Han*

Mar. 2019      **B.S., Department of Human-Centered AI**  
- Feb. 2023      **B.S., Applied Artificial Intelligence**  
                    Sangmyung University, Seoul (GPA: 4.22 / 4.5)

## Research & Work Experience

---

Apr. 2025      **Researcher @ AI & Bigdata Research Division, The Seoul Institute, Republic of Korea**  
- Present      - Conducting applied research on AI for public sector decision-making

Dec 2022      **Full-time AI Researcher @ Data Science & Artificial Intelligence Lab,**  
- Feb. 2025      **Sungkyunkwan University**  
                    - Developed MLLM-based models for sketch description and summarization  
                    - Designed and evaluated VLM and object detection models for multimodal analysis  
                    - Built and annotated a scene-level dataset (1,399 sketch samples across age groups)  
                    - Applied YOLOv8 for object detection and dataset generalization across domains  
                    - Conducted user studies and implemented AI web applications using FastAPI & GraphQL  
                    - Developed a real-time feedback system powered by LLMs for user-generated queries

June 2024      **Intern @ VOC System Team, RAON Data**  
- July 2024      - Conducted market research on VOC (Voice of Customer) systems  
                    - Performed B2C corporate analysis for system improvement strategies

May 2023      **SKT AI Fellowship (5th cohort) @ SK Telecom, Republic of Korea**  
- Oct 2023      - Developed an AI copywriting system using LLMs to enable personalized marketing  
                    - Built a knowledge graph leveraging real-world data from over 3 million customers to enhance content personalization  
                    - Conducted prompt engineering and implemented LLM Ops practices for scalable and maintainable model deployment

---

- Designed and deployed an end-to-end content generation LLM pipeline, from input data processing to output text generation
- Executed A/B testing via actual marketing MMS delivery to evaluate effectiveness and conversion performance

June 2022      **Language AI Assistant @ NLP Center, NC Soft Corp, Republic of Korea**  
 - Sep. 2022      - Participated in ABSA (Aspect-Based Sentiment Analysis) research  
                      - Constructed sentiment analysis datasets across domains such as finance, sports, and English news articles  
                      - Preprocessed and annotated domain-specific corpora for fine-tuning  
                      - Supported development of language understanding models

July 2021      **Undergraduate Researcher @ Institute of Intelligence Informatics Technology, Sangmyung University**  
 - Oct. 2021      - Conducted research on object detection models using real-world image datasets  
                      - Assisted in early prototyping of custom detection pipelines

## **Publications**

---

1. E. H. Jung\*\*, **C. H. Park** \*\*, H. J. Hong\*\*, J. H. Lee\*, “On the Deep Generative Models Explaining the Rationale to Emotionally Supportive Conversations”, KOSSES Autumn Conference, October 2022. (Domestic)
2. **C. H. Park**, M. G. Yang, et al., “A Study on Ensemble Model for Predicting Prompts in Images generated by Diffusion Model”, KIBME Summer Conference, June 2023. (Domestic)
3. J. W. Kang, J. W. Kim, M. G. Yang, **C. H. Park**, T. E. Kim, H. Y. Song, J. Y. Han\*, “SceneDAPR: A Scene-Level Free-Hand Drawing Dataset for Web-based Psychological Drawing Assessment”, Proceedings of the ACM on Web Conference (formerly WWW), May 2024.
4. J. W. Kim\*\* & J. W. Kang\*\* & M. G. Yang\*\* & **C. H. Park** \*\*, et al., “Developing an AI-based Explainable Expert Support System for Art Therapy”, ACM Transactions on Interactive Intelligence Systems (TiiS), IF=3.9, December 2024.
5. (Just accepted) M. G. Yang, **C. H. Park**, J. W. Kang, J. W. Kim, T. E. Kim, H. Y. Song, J. Y. Han\*, “PracticeDAPR: An AI-based Education-Supported System for Art Therapy”, ACM Conference on Computer-Supported Cooperative Work and Social Computing (CSCW), 2025.
6. (Revision) **C. H. Park** \*\*, M. G. Yang \*\*, T. E. Kim, H. Y. Song, J. Y. Han \*, “CheckDAPR: An AI-based Education-Supported System for Art Therapy”, ACM SIGKDD Conference on Knowledge Discovery and Data Mining (KDD), 2025.
7. (Under review) **C. H. Park** \*\*, M. G. Yang \*\*, H. S. Won, T. E. Kim, H. Y. Song, J. Y. Han \*, “Try DAPR for Unraveling Your Mind: An AI-based Explainable Drawing Assessment System”, ACM Transactions on Interactive Intelligence Systems (TiiS), IF=3.9, TBD.
8. (Under review) M. G. Yang, **C. H. Park**, H. S. Won, T. E. Kim, H. Y. Song, J. Y. Han \*, “BetaDAPR: An AI-based Expert Support System for Art Therapists with Qualitative and Quantitative Assistance”, ACM Conference on Computer-Supported Cooperative Work and Social Computing (CSCW), 2025.
9. (Under review) U. J. Jeon, C. H. Park, Y. W. Lim, J. Y. Han, Y. J. Cha\*, “Enhanced Object Detection in Person-in-the-Rain Test Using Auxiliary Deep Learning Methods”, TBD.

## **Patents**

---

1. J.Y. Han, H.Y. Song, J.W. Kang, J.W. Kim, M. G. Yang, **C. H. Park**, T. E. Kim “Drawing-Based Assessment Subject Analysis Device, Method, and System”, Republic of Korea (Apply: 10-2023-0158921)

### **Teaching Fellow**

---

**2023** Undergraduate Research Program (URP), Summer, Sungkyunkwan University

**2022** Computing Thinking and Game Design, Spring, Sangmyung University

**2021** Algorithms and Game Contents, Fall, Sangmyung University

### **Awards and Honors**

---

**2022** SW Scholarship, Sangmyung University  
**Best Paper Award**, 2022 KOSES Autumn Conference

**2021** Academic A Scholarship, Sangmyung University  
SW Scholarship, Sangmyung University

**2020** SW Academic A Scholarship, Sangmyung University

**2019** Academic A Scholarship, Sangmyung University

### **Programming Skills**

---

**Languages** Python (Fluent), C/C++ (Fluent), JavaScript, Java, Linux, React / Node.js, LATEX  
Pytorch (Fluent), Tensorflow (Fluent)

### **Portfolio Link**
